Protein Research Products

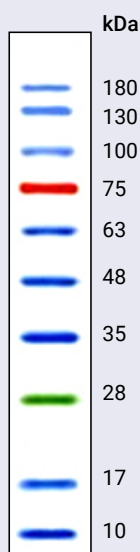

The **Prestained Protein Ladders** contains multiple pre-stained proteins, supplied in a protein gel loading buffer.

They are ready-to-use, no need to heat/boil, dilute or add any reducing agent.

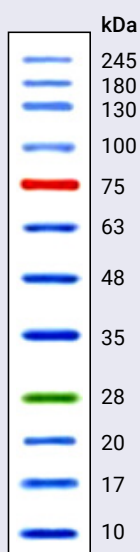

The Western Protein Marker is ready-to-use mixture of ten IgG-binding proteins offering a broad coverage of protein size from 15kDa to 200 kDa.

Additionally, it contains four pre-stained protein markers of 10, 25, 45 and 70 kDa making it easier to monitor protein separation, to verify the transfer efficiency on membranes, and to estimate the protein size of experimental samples.

Special Features

- ✓ Sharpness: distinguished bands
- ✓ Ready to use: direct loading
- ✓ Broad range coverage
- ✓ Show on Western picture
- ✓ **Room Temperature Stable**

Product Specifications

Product Name	Feature	Cat. No.	Size
AccuRuler Prestained Protein Ladder	10 bands, 10-180kDa	G02101	2x250µl
AccuRuler Plus Prestained Protein Ladder	12 bands, 10-245kDa	G02102	2x250µl
AccuRuler Broad Prestained Protein Ladder	12 bands, 10-310kDa	G02103	2x250µl
Western Protein Marker	Size marker for Western	WM1000	250µl
ECL Western Blot Detection Kit	Broad Sensitivity	G075	200ml
EZ-Blue Protein Gel Staining Solution	Non-toxic Protein Staining	GPS002	1000ml
EZ-Red Protein Blot Staining Solution	Western Blot Staining	GPS003	1000ml
